

AMENDMENTS TO THE CLAIMS

This listing of claims replaces all prior versions, and listings, of claims in the application:

Listing of Claims:

1 – 16. (Cancelled)

17. (Currently Amended) A method that facilitates message processing, the method performed within a computer comprising one or more processors and computer system memory, the method comprising:

requesting one or more messages;

determining from information associated with the one or more messages that each of the one or more messages belongs to a conversation group;

linking the one or more messages by a group identifier;

locking ~~[[a]]~~the conversation group, ~~that comprises at least the one or more messages,~~ the lock ~~prevents preventing~~ a disparate requestor from accessing the one or more messages; and providing exclusive serial access to the messages.

18. (Currently Amended) The method of claim 17, further comprising :

receiving one or more related messages

associating the related messages with the conversation group.

19. (Currently Amended) The method of claim 17, further comprising ~~automatically~~ updating the conversation group with incoming related messages.

20. (Original) The method of claim 17, further comprising utilizing a conversation group identifier to lock the conversation group.

21. (Original) The method of claim 17, further comprising storing the messages in-order.

22. (Currently Amended) A method that facilitates message processing, the method performed within a computer comprising one or more processors and computer system memory, the method comprising:

receiving a request for a message;
determining from information associated with the message that message belongs to a conversation group;
associating the message and other related messages with a conversation group;
locking the conversation group via a conversation group identifier; and
providing exclusive access to one or more messages of the conversation group to the requestor.

23. (Original) The method of claim 22, further comprising utilizing message identifiers to determine whether messages are related.

24. (Original) The method of claim 22, further comprising receiving the conversation group identifiers to associate with the conversation group.

25. (Original) The method of claim 22, further comprising dynamically updating the conversation group with incoming related messages.

26 – 28. (Cancelled)

29. (Currently Amended) A computer readable medium storing computer executable ~~components that instructions~~ which when executed upon one or more computer processors facilitate message processing by causing the processors to perform the method of claim 17. ;
~~comprising:~~

~~a component that receives a request for a messages;~~
~~a component that automatically associates the requested message with related messages~~
~~in a conversation group;~~
~~a component that locks the conversation group via a conversation group identifier; and~~
~~a component that provides exclusive serial access to the messages within the locked~~
~~conversation group.~~

30. (Cancelled)
